SUSTAINABLE DEVELOPMENT GOALS

Ensuring healthy lives and promoting well-being at all ages is essential to sustainable development. Currently, the world is facing a global health crisis unlike any other – COVID-19 is spreading human suffering, destabilizing the global economy and upending the lives of billions of people around the globe.

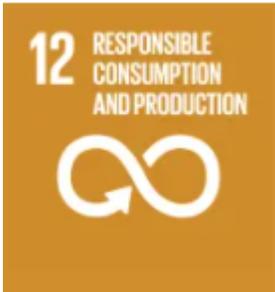

Education enables upward socioeconomic mobility and is a key to escaping poverty. Over the past decade, major progress was made towards increasing access to education and school enrollment rates at all levels, particularly for girls.

While substantial progress has been made in increasing access to clean drinking water and sanitation, billions of people—mostly in rural areas—still lack these basic services.

Inclusive and sustainable industrialization, together with innovation and infrastructure, can unleash dynamic and competitive economic forces that generate employment and income. They play a key role in introducing and promoting new technologies, facilitating international trade and enabling the efficient use of resources.

Worldwide consumption and production – a driving force of the global economy – rest on the use of the natural environment and resources in a way that continues to have destructive impacts on the planet.

Climate change is affecting every country on every continent. It is disrupting national economies and affecting lives. Weather patterns are changing, sea levels are rising, and weather events are becoming more extreme.

The ocean drives global systems that make the Earth habitable for humankind. Our rainwater, drinking water, weather, climate, coastlines, much of our food, and even the oxygen in the air we breathe, are all ultimately provided and regulated by the sea.

Nature is critical to our survival: nature provides us with our oxygen, regulates our weather patterns, pollinates our crops, produces our food, feed and fibre. But it is under increasing stress. Human activity has altered almost 75 per cent of the earth's surface, squeezing wildlife and nature into an ever-smaller corner of the planet.

The SDGs can only be realized with strong global partnerships and cooperation. A successful development agenda requires inclusive partnerships – at the global, regional, national and local levels – built upon principles and values, and upon a shared vision and shared goals placing people and the planet at the centre.

Our Outputs

**SUSTAINABLE
DEVELOPMENT GOALS**

SUSTAINABLE DEVELOPMENT GOALS

3 GOOD HEALTH AND WELL-BEING

Our Project will help to practice sports, physical activities. All these activities are important for the Good health and well-being

4 QUALITY EDUCATION

Our project output is a master degree, recognized and under the EQF guidelines

6 CLEAN WATER AND SANITATION

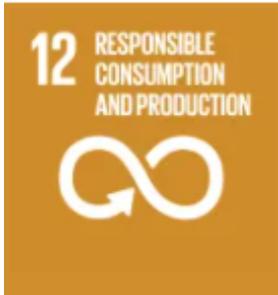

Our project will help people and organizations to better understand the importance of a clean water and will help them to reduce the impact of their activities on water quality

SUSTAINABLE DEVELOPMENT GOALS

Our project will help people and organizations to better understand the importance of a use of innovative infrastructure based on renewable goods, fulfilling the high standard of sustainability

Our project will help people and organizations to better understand the importance of a reduction of consumptions, using a sustainable way to organize events

Our project will help people and organizations to diminish the impact on the climate of their core activities, adding value to the organization

SUSTAINABLE DEVELOPMENT GOALS

Our project will help people and organizations to better respect the life below water, reducing the impact of the activities and enforcing the relation between sports and sustainability

Our project will help people and organizations to better respect the life on land, reducing the impact of the activities and enforcing the relation between sports and sustainability

Our project is a partnership project with different organizations involved

Environment Protection Manager

- ▶ To Help the Organization and sports organization to be comply with the Sustainability Developments Goals
- ▶ To be able to reduce the climate impact of the organizations and events
- ▶ To use sports in order to create social awareness on climate Exchange and sustainability
- ▶ To create awareness on social inclusion and sustainability
